

ACCESSORIES / 1600W HEATING ELEMENTS

PRODUCT INFORMATION

ACCESSORIES / 1600W HEATING ELEMENTS

Built-in heating element

There is not enough current that damage the heating elements if powerful elements winding. But built-in heating element solve this problem that heating element burn out for loose contacts.

Longer life of heating elements: Do clean photosensitive with cotton swab to avoid dust covering it caused lower sensitivity.

Spring: The spring inside of heating elements is good thermalconduct-ivity which results in difficulty damage of heating elements

SPECIFICATIONS

Model	1600W Heatine elements
Voltage	230V
Material	Ceramic
Application	Heating elements
