

COMPACT HDPE HOT WEDGE WELDING MACHINE WIN-GM1

PRODUCT INFORMATION

Compact HDPE Hot Wedge Welding Machine WIN-GM1

Compact Geo Hot Wedge Welder. The welding machine adopts advanced hot woven structure, smaller volume, lighter weight, power is larger, apply to 0.2 2.0 mm welding of various thermal membrane material with two-way into film and unilateral ipsilateral into film two models, products applied to tunnel, subway, water conservancy, breeding, pool, landfills, chemical mining, sewage treatment, waterproof roof construction in areas such as seepage control projects.

This machine is not only able to show the welding temperature and welding speed, the control system adopts closed loop control, regardless of the external voltage change, or upward or downward direction of welding under the condition of the external environment changes, such as negative feedback automatically adjust the setting temperature and speed, make the welding parameters is more stable, more reliable welding quality.

SPECIFICATIONS

| | |
|---------------------------|--|
| Model | WIN – GM1 |
| Rated Voltage | 230V/120V |
| Rated Power | 1400W |
| Frequency | 50/60HZ |
| Heating Temperature | 50~450 |
| Welding Speed | 0.5-6.0m/min |
| Welding pressure | 100-1000N |
| Material Thickness Welded | 0.2mm-2.0mm single layer |
| Seam Width | 15mm*2,Interior Cavity 15mm customized |
| Weld Strength | ≥ 85%material |
| Overlap Width | 12cm |
| Membrane Laying Ways | Membrane laying way by one edge against the other edge |
| Digital display | function Temperature and speed dual display |
| Body weight | 9kg |
| Warranty | 1 year |
