

ELECTROMAGNETIC WAVE WELDER WIN-C4200

PRODUCT INFORMATION

Electromagnetic wave welder WIN-C4200

The welding machine adopts the principle of electromagnetic induction heating, and through non-contact induction, the induction gasket instantly heats and melts, and firmly adheres to the waterproof board, which greatly improves both the welding quality and the welding speed.

SPECIFICATIONS

Model WIN – C4200

Rated Voltage 230V

Rated Power 4200W Adjustable

Frequency 50Hz

working frequency automatic

Welding surface $\geq \varnothing 75\text{mm}$

weight 7.5kg

Dimensions (length \times width \times height) 260 x 280 x 110mm

Warranty 1 year

ADVANTAGES

Electromagnetic welding gun

Using the principle of electromagnetic induction heating, through non-contact induction, the induction gasket will instantly heat and melt, and it will be firmly adhered to the waterproof board.

Main control box

High-power automatic frequency modulation digital circuit is adopted, and the design of over-current and over-heat protection is added, making it safer and more reliable to use.

Special hot melt gasket

Matching special hot-melt gaskets, faster welding speed and better welding effect.

LCD display

Digital LCD screen display, easy and intuitive operation, efficient and stable use.
