

TESTING TOOLS / SPARK LEAK DETECTOR WIN-T003

PRODUCT INFORMATION

TESTING TOOLS / SPARK LEAK DETECTOR WIN-T003

The electric spark leak detector is one of the supporting testing products of the WeldIn series of geomembrane welding machines, which detects leaks by releasing high-frequency electric waves.

ADVANTAGES

The electric spark leak detector is one of the supporting testing products of the Lesite series of geomembrane welding machines, which detects leaks by releasing high-frequency electric waves.

In the construction site, the weld quality of plastic sheets and geomembrane was detected by fixed-point leak detection.
